

## 8-10 New Fetter Lane – London

**CGI illustration of main office block**

**Description:** Refurbishment of an existing 10 storey 1960's office block in the heart of London complete with a floorplate extension to one elevation + an additional 2 floors at roof level

Existing facade to be demolished for the installation of a new granite rainscreen and glass curtain wall system design by MAS

Other features include fully glazed panoramic lift shafts by MAS + glazed curtain wall facade above main entrance, including full glass revolving door at ground level

A 6 storey new build link building also forms part of the scheme, which will be a zinc clad rainscreen complete with SG glazed curtain wall elements

An SG curtain wall clad link bridge will link the main office block and the link building

MAS are providing a complete vertical envelope solution

**Main Contractor:** Kier Wallis

**Architect:** Tate Hindle Architecture and Design

**MAS Start on Site:** July 2011
