

Moonraker Alley – Great Suffolk Street, London

Pre-Tender CGI of Moonraker Alley Development

Description: This new build development comprises 2 No. blocks of student residential accommodation along with ground floor commercial space.

The main block illustrated on the right will be formed using MAS F50 curtain wall to the ground level commercial space, Hueck unitised facade between the first and seventh floor levels (including brick slip cladding), a combination of aluminium rainscreen/MAS F50 curtain wall to the roof level pods and MAS W60 windows to the central light-wells.

The Delta block on the left will be formed using MAS F50 curtain wall to the ground level commercial space and Hueck unitised facade to the remainder.

In addition McMullen will also be supplying bespoke balcony constructions within the facade package to both buildings.
